

A.K.O., Inc. Joins IFMSA, Continues Expansion into Fastener Market

A.K.O., Inc. Torque Specialties announces strategic partnership with International Fastener Machinery & Suppliers Association (IFMSA). AKO has recently joined the IFMSA, with a strong vision to supplement their continued expansion into the fastener marketplace.

A.K.O., Inc. Torque Specialties, located in Windsor, Connecticut, is an international leader in the manufacturing of torque calibration and testing equipment. With more than 60 years of experience, AKO excels at providing their customers with an array of products to support their unique testing needs. The fastener market has been a cornerstone industry for AKO, where they offer the highest quality testing and calibration equipment with an emphasis on surpassing every end user's specific testing needs.

With a complete line of equipment designed specifically for the fastener industry, AKO's partnership with IFMSA is a great match for the decade ahead. "With the new launch of products and software we have planned in the near future, joining IFMSA makes perfect sense for us," said AKO's new COO, Jim Pagano. "They have the experience and industry knowledge we can capitalize on to leverage our growth in this important market."

A.K.O., Inc. Torque Specialties also houses their ISO 17025-2017 certified calibration laboratory at their facility in Connecticut. AKO receives a large variety of torque tools for calibration on a daily basis. They use AKO designed equipment to calibrate torque transducers, hydraulic torque wrenches, torque multipliers, pneumatic torque drivers & click wrenches from 2 oz-in to 150,000 lb-ft. to the highest traceable industry standards. Training for individuals or small groups are also available at their home HQ or on-site at a customer's location.
