

BBI's Generic Anchor Test Program Completed

Brighton-Best International is pleased to announce that it has completed a comprehensive testing program for its Commercial (generic) Heavy-Duty Anchors. This report is available on the Brighton-Best website under Products - Certificates. Visit www.brightonbest.com.

This report was conducted by one of the most prestigious testing labs in North America.

The actual testing was to ASTM E-488 criteria for the following anchor families:

- Commercial Wedge Anchor (Zinc) Family # 279
- Commercial Wedge Anchor (HDG) Family # 158
- Commercial Wedge Anchor (Stainless 304) Family # 616
- Commercial Wedge Anchor (Stainless 316) Family # 617
- Commercial Drop-In Anchor (Standard and Shorty Versions) Family #268

This engineering data sheet is a condensed version covering the major technical requests received daily into the company. There is also a master copy that encompasses all of the actual testing data to include drawings, chemical analysis and other important data. For additional technical data, please contact the Brighton-Best Anchor Product Manager, Jim Hahn, at jhahn@brightonbest.com.

This report now provides technical backup for these anchor families with verifiable testing and builds confidence for distributors and users in purchasing these anchors from Brighton-Best International.
