

Call for Speakers Opens for Fastener Fair Technology Conference

Fastener Fair Mexico organizers have opened the call for speakers for the *Fastener Fair Technology Conference*, which will take place concurrently with the exhibition on June 20-21, to be held for the first time in the city of Guadalajara, Western Mexico's manufacturing hub.

Fastener Fair Mexico invites all industry professionals to submit proposals on industrial fastening technology, innovations and solutions, with a focus on maintenance and repair topics. The Fastener Fair Technology Conference was well received in Mexico City in 2017, with full rooms in all sessions. It proved to be a real opportunity for education and training for the fastener supply chain that attends Fastener Fair Mexico, including OEM end users, distributors and wholesalers.

“The *Fastener Fair Technology Conference* is a unique opportunity for speakers to share expertise and network with industrial fastener professionals based in the dynamic Western Mexico manufacturing market,” said Melissa Magestro, Executive VP of Mack Brooks Exhibitions Inc., organizer of Fastener Fair Mexico.

The call is open for both exhibitors and users of the industry. All professionals interested in speaking are invited to submit non-commercial proposals by January 31, 2018 at www.fastenerfair.com/mexico.
