

Rotor Clip Company Gives Full Support to Manufacturers Tasked to Combat COVID-19

Rotor Clip Company Inc. announced that it is giving its full support to customers that produce medical components or equipment needed to treat or halt the spread of COVID-19. Rotor Clip is dedicating time and resources from engineering, supply chain, production, QA, and logistics to expedite its parts to customers producing much needed medical equipment such as ventilators or filtration systems among others.

A vast array of OEM and Tier 1 customers tasked with building such equipment, have already taken advantage of this expedited process. In one instance, an OEM reached out to Rotor Clip to supply critical wave springs needed for their current ventilator production project. In only 2 business days, Rotor Clip was able to produce and obtain quality approval to ship these parts.

Craig Slass, Co-President of Rotor Clip, stated: “During this crisis, Rotor Clip Company currently is open and has full manufacturing capability to support our customers with our full range of products. We will put our full resources behind any customer producing components for essential medical devices needed to combat and treat the Coronavirus.”

In order to facilitate those needs Rotor Clip has setup [a specific webpage for those customers to start the expedited process.](http://solutions.rotorclip.com/medical-covid-support) (<http://solutions.rotorclip.com/medical-covid-support>)

Rotor Clip manufactures a full line of inch, DIN, ANSI metric and JIS retaining rings to world standards, as well as a complete line of constant section rings, spiral retaining rings, wave springs, and hose clamps.

The company serves all manufacturing Industries, including Automotive, Aerospace, Defense, Energy, and Medical with standard and custom products made from standard spring and stainless steels, as well as exotic alloys and medical grade materials.

There are over 50 different styles and over 1,000 part numbers to fit virtually every application. Rotor Clip operates in the US, UK, Germany, China, and the Czech Republic - providing worldwide service to its customers. Recognized globally, Rotor Clip has received numerous quality awards from major OEMs, automotive manufacturers, and distributors. Rotor Clip also produces its products under IATF 16949, ISO 9001, AS9100D, and ISO 14001 standards.

Rotor Clip Company is located at 187 Davidson Avenue, Somerset, New Jersey, 08901. Call 732-469-7333, or email info@rotorclip.com.
