

News from SPIROL International Corporation

SPIROL International Corporation announced that two of its world class manufacturing locations have received the 2018 General Motors Supplier Quality Excellence Award for achieving operational excellence and quality control. This is SPIROL Canada's fifth year and SPIROL Connecticut's fourth consecutive year receiving this prestigious award.

According to the letter sent by General Motors notifying SPIROL of the awards: "The award is given to specific manufacturing locations and only our top performing supplier manufacturing sites are eligible to receive it. Suppliers who receive this award have met or exceeded a very stringent set of quality performance criteria and have achieved the cross-functional support of the entire GM organization. This was even a bigger challenge as GM continues to launch many new and exciting products."

SPIROL manufactures Coiled Spring Pins, Slotted Spring Pins, Solid Pins, Compression Limiters, Inserts for Plastics, Installation Technology and Vibratory Feeding Equipment at their Connecticut facility, and Tubular Products including roll formed Spacers, Compression Limiters, Dowel Bushings, Spring Dowels, and Ground Hollow Dowels at their Canadian facility.

With only 10% of General Motors' suppliers having received this award for 2018, these are significant achievements and a testament to SPIROL's operational excellence and quality control – especially considering the millions of parts supplied to General Motors from SPIROL's global locations.

In other news, SPIROL is pleased to announce the recent launch of Shop.SPIROL.com for online purchasing of Coiled Spring Pins in the United Kingdom and Germany.

SPIROL's eCommerce site, Shop.SPIROL.com, is quick, easy and secure. While all of SPIROL's engineered fasteners will eventually be available through Shop.SPIROL.com, the first product available for online purchase is the Coiled Pin.

As the inventor of the Coiled Spring Pin in 1948, SPIROL has set the industry standard for this unique engineered fastener. SPIROL offers the world's largest standard offering of Coiled Pins available in light, standard and heavy duties in diameters ranging from 0.8mm (1/32") up to 20mm (3/4"). Visitors of Shop.SPIROL.com can also request certifications, search by part number or specification, select from several materials and finishes, as well as submit a request for quote for custom specifications.

In addition to being able to purchase Coiled Pins, customers can conveniently download 2D drawings and 3D models directly from Shop.SPIROL.com.

SPIROL now offers eCommerce in the UK, Germany, USA and Canada.
