

Suncor Stainless Expands, Announces Shackle Program

Suncor Stainless is looking towards growth to increase production and service to customers. Continuing to move forward after the recent opening of their new facility in Las Vegas, Nevada, in May of 2017, Suncor is adding new machines, a box truck, new personnel and 35,000 square feet of production space in their facility in Plymouth, Massachusetts.

They have already begun by adding positions to customer service, sales and their warehouse to keep up with the ever-expanding demand. The completion of this project in 2019 will allow Suncor to increase production of domestic products, boost inventory levels, offer faster delivery times, and reduce backorders.

“We started our expansion a few years ago when we reconfigured the warehouse in Plymouth to accommodate more stock and last year when we opened the Las Vegas warehouse,” said David Morgan, vice president of sales and marketing for Suncor Stainless. “We’re now taking additional steps to grow Suncor by bringing in more people and machines to increase our domestic manufacturing, which in turn will require more space, leading to our decision to add 35,000 square feet to our warehouse.”

Most recently, two new machines have joined Suncor’s line-up of both Manual and CNC Machine Tools. They’ve added a Track Model #TRL 1630SX CNC Lathe and a Trak model #DPM3 CNC Bed Mill. Both machines offer conversational controls which allow more flexibility and programming options than some traditional machines, making them well suited for prototyping and for short-run production of milled and turned parts.

Suncor Stainless also is looking to expand their line of cast shackles to offer their customers an even larger selection. They announced their new shackle program with added styles and new sizes. Suncor introduced the Bow Shackle with Captive Pin in sizes ranging from 5/32” to 15/32”, the Long D Shackle with No Snag Pin in sizes ranging from 1/4” to 1/2”, the Twist Shackle with Captive Pin in sizes ranging from 1/4” to 3/8” and the Twist Shackle with No Snag Pin in sizes ranging from 1/4” to 1/2”.

“We took a long look at the styles and sizes of cast shackles that we were offering and agreed that we could add more,” Morgan said. “We wanted all of our cast shackles to come in a variety of sizes along with options of screw, captive and no snag pin styles for each body type.”

Suncor is also looking to save their customers some money as well as ship product faster and reduce backorders. They will be offering volume discounts on cases along with dual inventory maintenance, which will allow large quantities of shackles to be stocked in both Plymouth and Las Vegas warehouses. This will make product readily available with little wait time to meet the increasing demand.

Suncor Stainless, Inc. is a leading manufacturer for stainless steel hardware in the industrial, marine, government, architectural, OEM and commercial industries. Suncor’s

modern facilities manufacture the highest quality stainless steel chain, wire rope assemblies and custom parts. The in-house capabilities include a product development staff whose tireless efforts, along with valuable input from clients, work to continuously improve and perfect their ever-expanding product line.
