

News from Threaded Fasteners, Inc.: New Website Launched, Team Members Tapped to Serve on Manufacture Alabama Committees

Founded in 1979 in Mobile, Alabama, Threaded Fasteners, Inc. (TFI) marks 38 years in business this year as the employee-owned firm continues to expand operations and launch new ventures. To share more information about TFI, its team members, and the quality products it manufactures, packages and distributes, a new website was just launched: <https://threadedfasteners.com/>

On the home page, visitors will find a video that shows what goes on inside several of TFI's eight locations: men and women hard at work, manufacturing quality nuts and bolts for distribution across North America. There's also a timeline noting milestones and information about the Threaded Fasteners Charitable Foundation, which contributed to more than 50 non-profit organizations locally and in the seven other cities spanning five states where TFI has offices.

With more than 140 dedicated employee owners, Threaded Fasteners maintains \$4.5 million worth of inventory across six distribution warehouses, from Alabama to Mississippi, Florida, Oklahoma, and Tennessee, to meet the global needs of our customers from industries including power generating utilities, chemical and electrical, commercial marine construction, stainless steel fabricators, metal building manufacturers and Department of Transportation (DOT) fabricators.

In other news, Todd Hoffman, Director of Corporate Operations for Threaded Fasteners, Inc., has been selected to serve on a committee with Manufacture Alabama, a state trade association that works to enhance opportunities for manufacturers across the state. Hoffman is slated to join the committee for Workforce Development and Human Resources for multi-year terms.

“The workforce development component typically consists of working with schools and secondary education institutions to better prepare students for jobs in manufacturing,” Hoffman said. “On the HR side, participants hear from Manufacture Alabama members and other experts about rules, regulations and sometimes complicated legal matters pertinent to HR professionals in manufacturing.”

Alabama is home to more than 5,200 manufacturing, assembly and processing firms that employ more than 312,000 people and export \$8.3 billion in products and services, according to the Alabama Development Office. Manufacturing's contribution to Alabama's economy is more than \$27 billion annually, according to the National Association of Manufacturers.

Other Threaded Fasteners team members also represent the manufacturer of quality nuts and bolts by serving with the trade association. Threaded Fasteners Corporate Counsel, Brian Pugh serves on MA's Corporate Counsel Committee, while Jerrad Douberly, Vice President of Commercial Sales for TFI, previously served on the Economic Growth and Expansion Committee.

“The committee meetings offer members an opportunity to discuss ideas, ask questions and exchange best practices with manufacturing peers from across Alabama,” Hoffman said. “I’m looking forward to the opportunity.”

Manufacture Alabama (MA) is a state trade association dedicated exclusively to the competitive, legislative, regulatory and operational interests and needs of manufacturers and their partner industries and businesses. Based in Montgomery, Ala., Manufacture Alabama represents hundreds of companies that share common interests and goals and face common competitive challenges in today's global marketplace. Some members are among the nation’s largest, most recognized corporations. Many are mid-sized or smaller family-owned manufacturers or manufacturing suppliers and vendors. All are vital parts of a manufacturing base crucial to Alabama's economy and job base. For more information about Manufacture Alabama, visit their website manufacturealabama.org.

Threaded Fasteners Inc. (TFI) is an employee owned business that specializes in the manufacturing, custom packaging and distribution of steel fasteners, including tower and electric utility bolts, anchor bolts, A325 structural bolts, A394 tower bolts, nuts, washers and more. Its Custom Manufactured Parts division works to develop specialty materials for clients. With more than 140 dedicated employee owners, TFI maintains \$4.5 million worth of inventory across six distribution warehouses, from Alabama to Mississippi, Florida, Oklahoma and Tennessee to meet the global needs of customers from industries including power generating utilities, chemical and electrical, commercial marine construction, stainless steel fabricators, metal building manufacturers and Department of Transportation (DOT) fabricators. More information about TFI can be found on its website at threadedfasteners.com or through social media platforms including Facebook, LinkedIn and Twitter.
